Building a Vintage Cukras Chassis, page 2

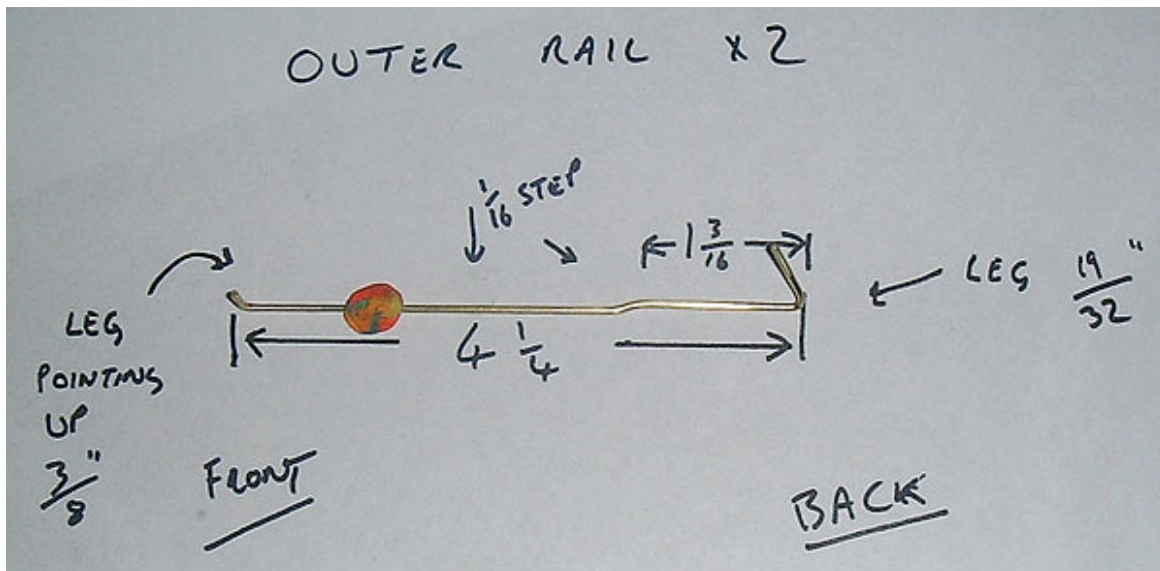

A photo-essay by Phillip Niyazi, Aug. 21, 2003

Now it's time to bend up the brass rods. Follow the pictures below and you should be ok.

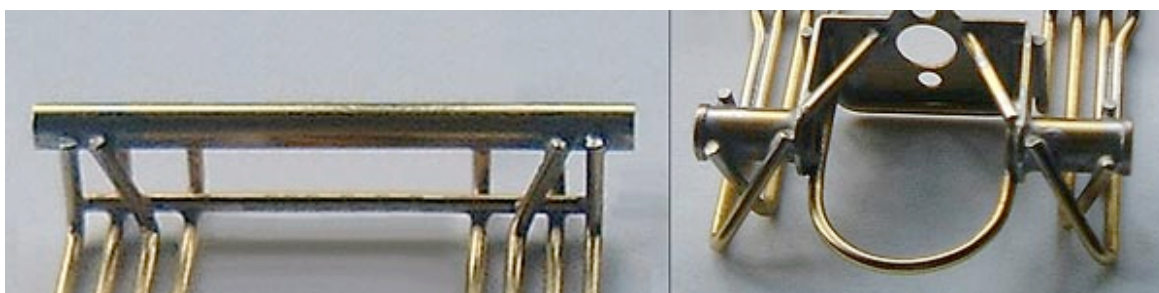

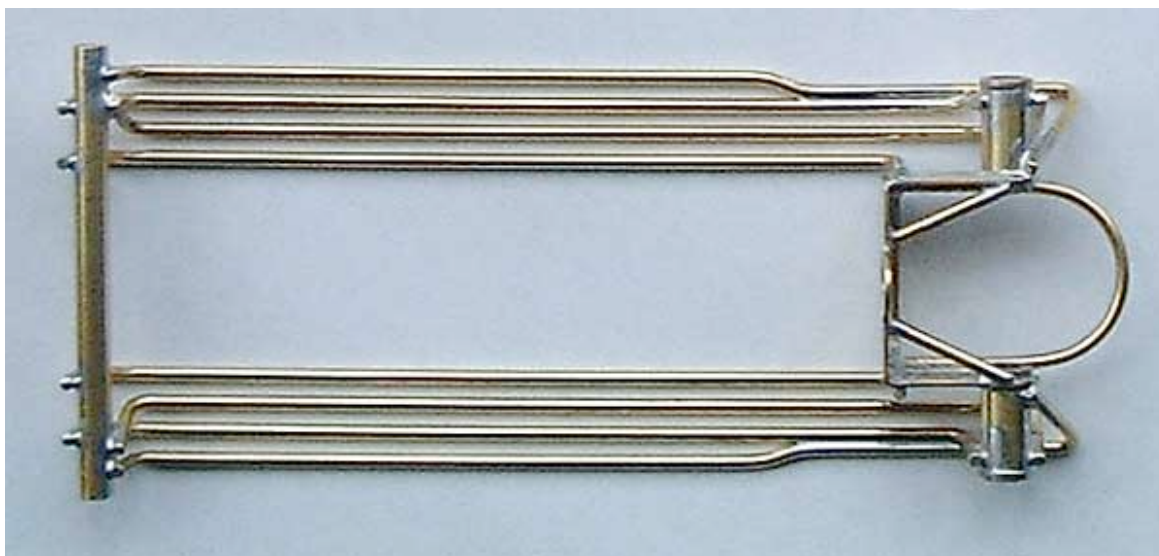

Below: The 4th rail, the outer-most rail - this one is tricky. Just keep trying until you get it right.

Below: As you are soldering them up, keep checking the pictures of the finished chassis, because the uprights don't all stick up at 90 degrees, they lean this way and that way!

Below: Chassis should look like this so far.
