Phillip Niyazi: Reproduction of a 1967 John Cukras Pro Chassis

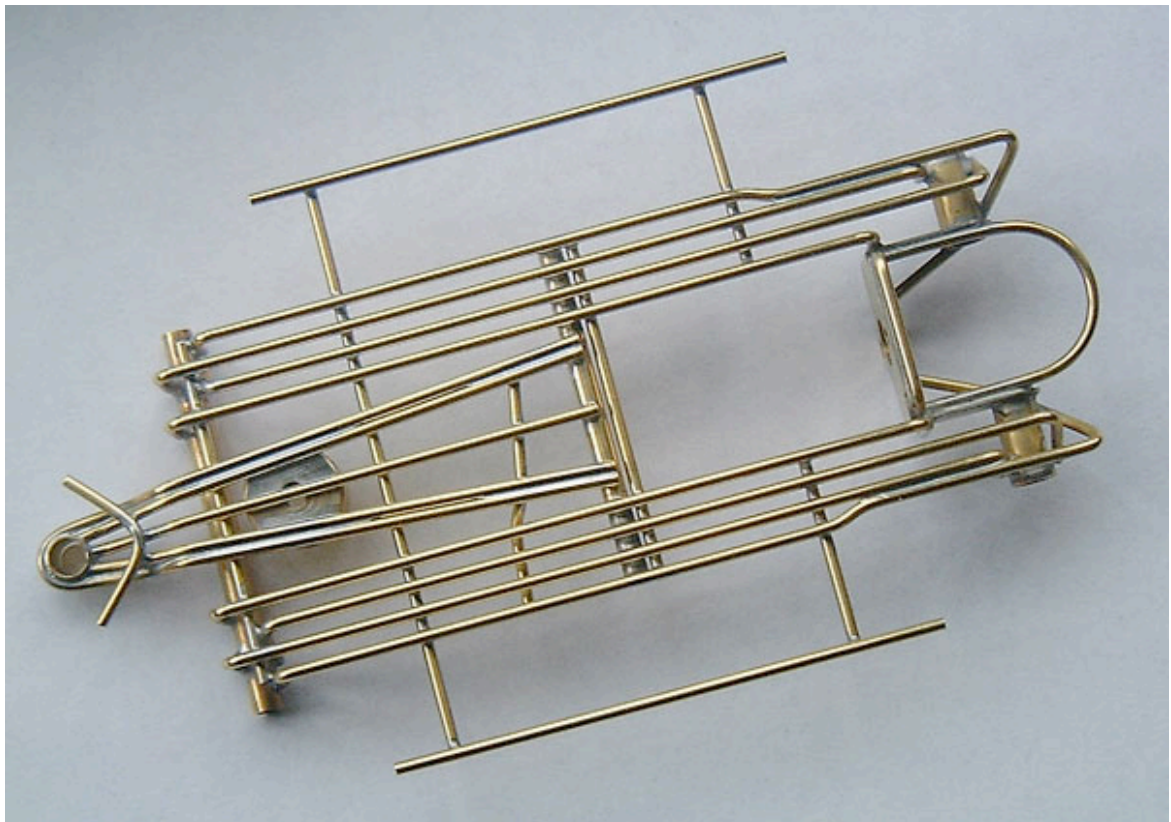

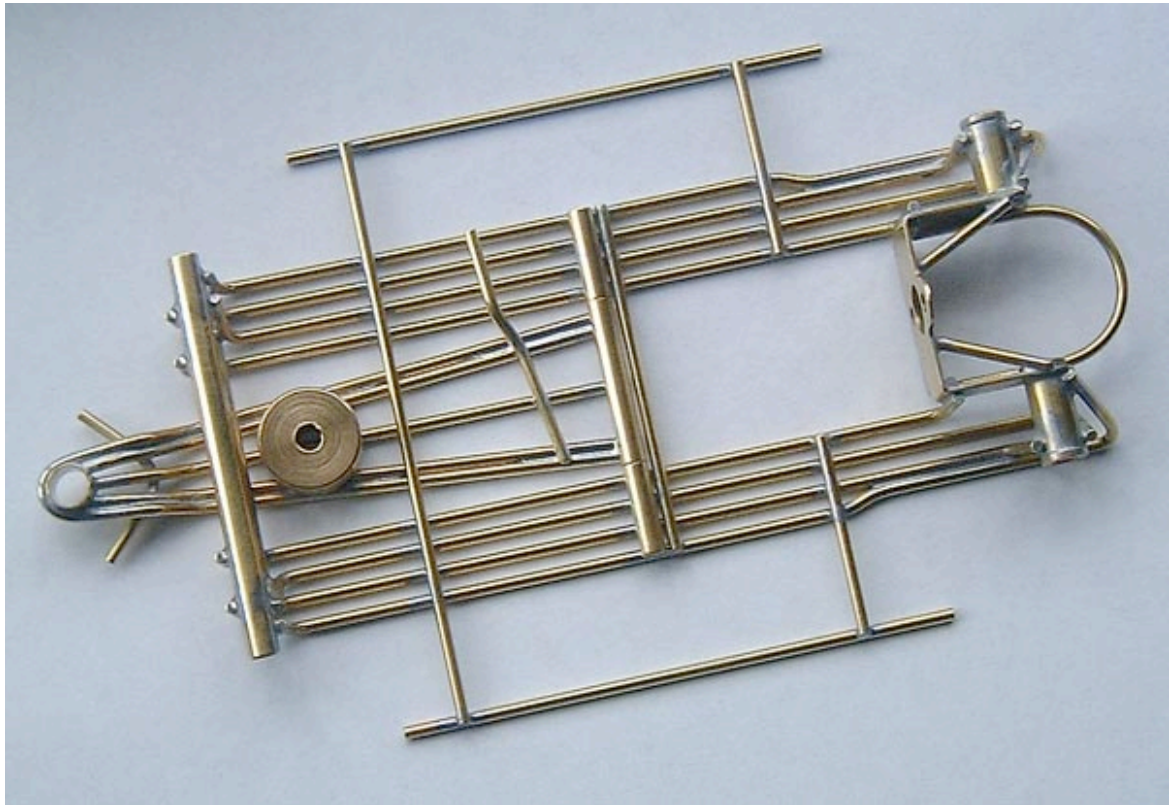

Phillip Niyazi has sent these pictures of his reproduction of a John Cukras 1967 inline brass chassis, exhibiting as always the highest level of craftsmanship. He has also sent a photo-essay about building this chassis, which you can read [here](#). Thanks again, Phillip! --TJA

Phillip writes:

I used the rear axle bracket you sent me to build a John Cukras chassis. It's the chassis pictured on pages 16 and 17 in *Car Model*, September 1968. As far as chassis go, this one is easy to make, but it really is a beautiful chassis. Top marks to John Cukras when he designed this one!
